

VS Beer Cooler Saves 39%

An independent study shows that the new **Kilkenny VS** beer cooler is 39% cheaper to run

Saving at least
€550
Per Year*

Conventional ice bank and **Kilkenny Variable Speed** coolers were compared in 'Before and After' study in Idlewild Bar on Fade St. in Dublin

- Study by Nimbus at Cork Institute of Technology, reviewed by major breweries
- Results show that the **Kilkenny VS** is the most energy efficient cooler on the market

Conventional glycol and ice bank coolers run at full power 24/7 to maintain python temperature...

The Kilkenny VS works differently:

- Pump and refrigeration output automatically adapt to match exact requirements.
- This means that the cooler runs at LOWER POWER during slack periods / closed hours.
- Outlets with shorter python runs benefit from even greater pump power savings.

"The cooler never uses more electricity than is necessary to maintain temperature."

Award Winning Design Recognised by major Irish Institutions

- IBEC Environment Awards Best Product
- Highly Commended - Institute of Refrigeration Ireland
- Finalist - SEAI Awards (Innovation Category)

John Smea accepts IBEC Environment Award (Best Product or Service) for the Kilkenny VS

What they Say:

"Energy saving is a huge concern for our business and so we are delighted with the Kilkenny VS system that we installed in Idlewild. We have other projects in the pipeline and I will ensure the VS cooler is part of the specification."

- Linda Monahan: Operations Manager, Market Bar Group, Idlewild Bar, Button Factory.

"The results of two extensive technical assessments that we performed clearly indicate that the Kilkenny VS Beer Cooling System is superior to the standard ice bank and glycol based beer cooling systems that are currently available."

- Michael Desmond: Energy Engineer, Nimbus Centre at Cork Institute of Technology.

About the Company:

Kilkenny Cooling Systems has been the market leader in draught beer cooling systems for over 35 years. We have supplied in excess of 13,000 machines to outlets right across Ireland, including all of the most prestigious venues such as Croke Park, Aviva Stadium, 3Arena, Odyssey Arena, Bord Gais Energy Theatre, Titanic Centre, Guinness Storehouse and many more.

The VS Beer Cooling System is the latest of many innovations we have brought to the industry since we began manufacturing beer coolers in 1980.
